### FREKOTE® WATER-BASED RELEASE AGENT FOR HIGH PERFORMANCE COMPOSITES

Rocky Hill, Conn. — November 15, 2007.... Henkel Corporation has introduced Frekote® Aqualine® C-600™, a proprietary water-based mold release agent for use on high performance composite parts and structures. Originally developed for releasing large-scale parts such as wind mill blades, this release agent has been proven to greatly reduce reject rates.

Formulated with multiple release technology, Frekote® Aqualine® C-600™ is wipe-applied at room temperature and cures in ambient conditions in just 30 minutes. Nonflammable and low in VOCs, this product is highly stable, resisting both freeze and thaw cycles and offering a nine-month shelf life from date of manufacture when stored at 77°F.

Once Frekote® Aqualine® C-600™ is applied, it provides multiple release cycles and requires only spot touch-ups. The product's low mold build-up results in excellent reliability. Frekote® Aqualine® C-600™ is available in 1-gallon, 5-gallon, and 55-gallon containers.

For more information on Frekote® Aqualine® C-600™, call 1-800-323-5106, or visit [www.frekote.com](http://www.frekote.com).

For more than 130 years, Henkel has been a leader with brands and technologies that make people's lives easier, better and more beautiful. Henkel operates in three business areas - Home Care, Personal Care, and Adhesives Technologies - and ranks among the Fortune Global 500 companies. In fiscal 2006, Henkel generated sales of 12.740 billion euros and operating profit of 1,298 million euros. Our 52,000 employees worldwide are dedicated to fulfilling our corporate claim, "A Brand like a Friend," and ensuring that people in more than 125 countries can trust in brands and technologies from Henkel.
